OUR FAW REFRESHER SYLLABUS

These annual courses will only be of use to a student that has already completed the 3 day FAW course and it is an ideal way to keep up the skills they have already learnt and find out about any recent changes to protocols before attending the 2 day FAWR course (after 3 years).

And the end of these short 3 hour courses the student will be reminded how to:

- Assess and prioritise situation in an emergency.
- Administer first aid to a casualty who is unconscious (including seizure).
- Administer Cardiopulmonary resuscitation, CPR.
- Administer first aid to a casualty who is Bleeding.
- Administer first aid to a casualty who is suffering from Shock.

The above subjects are the main and assessable parts of the FAW & FAWR courses and will always be cover. When we have time allowing, often dependant on group size, our trainers will gladly answer questions on or demonstrate aspects of any our subject that we cover.
